INTRODUCTION

GENERAL COMMENTS

This publication is the second in an annual series and presents retail and service trade statistics on Alberta for the year 1973. Statistics presented in this publication deal with all known businesses within the scope of the annual survey used to collect the data. Approximately 17,000 businesses were surveyed to collect the data for the reference year 1973.

The mail survey, conducted immediately following the reference year is based on all businesses provincially licensed to operate in Alberta and is augmented by a list of businesses operating in national parks. Respondents, report on either a fiscal or calendar year basis and provide information on the number of male and female employees, total payroll and total receipts from sales or services. The survey covers all retail and service operations with the following exceptions: retail trade excludes door-to-door selling as well as retailing taken on as a minor activity by manufacturers and wholesalers; service trade excludes professions, institutions and establishments which provide a service to other businesses.

PUBLICATION CONTENT

Five statistical tables are provided in this publication. Each table provides retail and service trade statistics at different geographic levels.

Table I - Principal Statistics - Retail and Service Trade by
Business Type, Alberta, 1973

Statistics in this table show the total number of establishments, male and female employees, payroll and receipts from sales or services in all Alberta. Data are arranged according to type of business activity, (i.e., confectionery or grocery stores).

Table II - Principal Statistics - Retail and Service Trade
by Business Type, Alberta Cities, 1973

Statistics relating to the larger cities of Calgary, Edmonton, Lethbridge, Medicine Hat and Red Deer are arranged according to type of business. Statistics relating to the smaller cities of Camrose, Drumheller, Grande Prairie, Lloydminster (Alberta portion) and Wetaskiwin are arranged according to major type of business activity (i.e., Food and General Merchandise). The table provides statistics on number of establishments, male and female employees, payroll and receipts from sales or services.

Table III - Principal Statistics - Retail and Service Trade by Major
Business Group, Alberta Towns of Population 2,000 and
Over, 1973

Retail and service trade statistics by major type of business activity are presented and relate to forty-two towns in the province. Statistics for the various towns show the number of establishments, male and female employees, payroll and receipts from sales or services.

Table IV - Retail and Service Trade - Outlets and Receipts,
Selected Alberta Communities, 1973

Number of outlets and total receipts are provided for retail and service trade activity in the majority of communities in Alberta. Communities omitted are those for which no data could be released because of the disclosure guidelines under which the Bureau operates. These guidelines guard against the release of data pertaining to individual establishments. In some instances it is only possible to show the combined total of retail and service trade receipts.

Table V - Retail and Service Trade by Major Business
 Group, Alberta Census Divisions, 1973

The table in this section provides statistics on the number of outlets and receipts from sales or services by major type of business activity for the fifteen census divisions in Alberta. Statistics are also provided for the various Counties, Municipal Districts, Improvement Districts, Special Areas and selected major centres within the census divisions. In order to identify the geographic areas being referred to by these statistics a census division map for Alberta precedes the table.

DEFINITIONS

The following definitions apply uniformly throughout the publication:

Retail Outlet: A business engaged primarily in selling merchandise to final users.

Service Outlet: A business engaged primarily in providing a service to the public for a fee.

PUBLICATION CRITERIA

Statistics presented in this publication conform to guidelines which prevent disclosure of information pertaining to individual businesses. An asterisk in place of any statistic indicates that disclosure is not possible. To prevent residual disclosure it is sometimes necessary to suppress another statistic.

ACKNOWLEDGEMENTS

Appreciation is extended to the many establishments which regularly provide the data necessary for the preparation of this publication.

(1) The 1963 - 1969 statistics are presented on the basis of number of firms while data for 1970 and subsequent years are presented on a number of outlets basis. Refer to "Retail and Service Trade Statistics, 1969 - 1972" for further explanation.

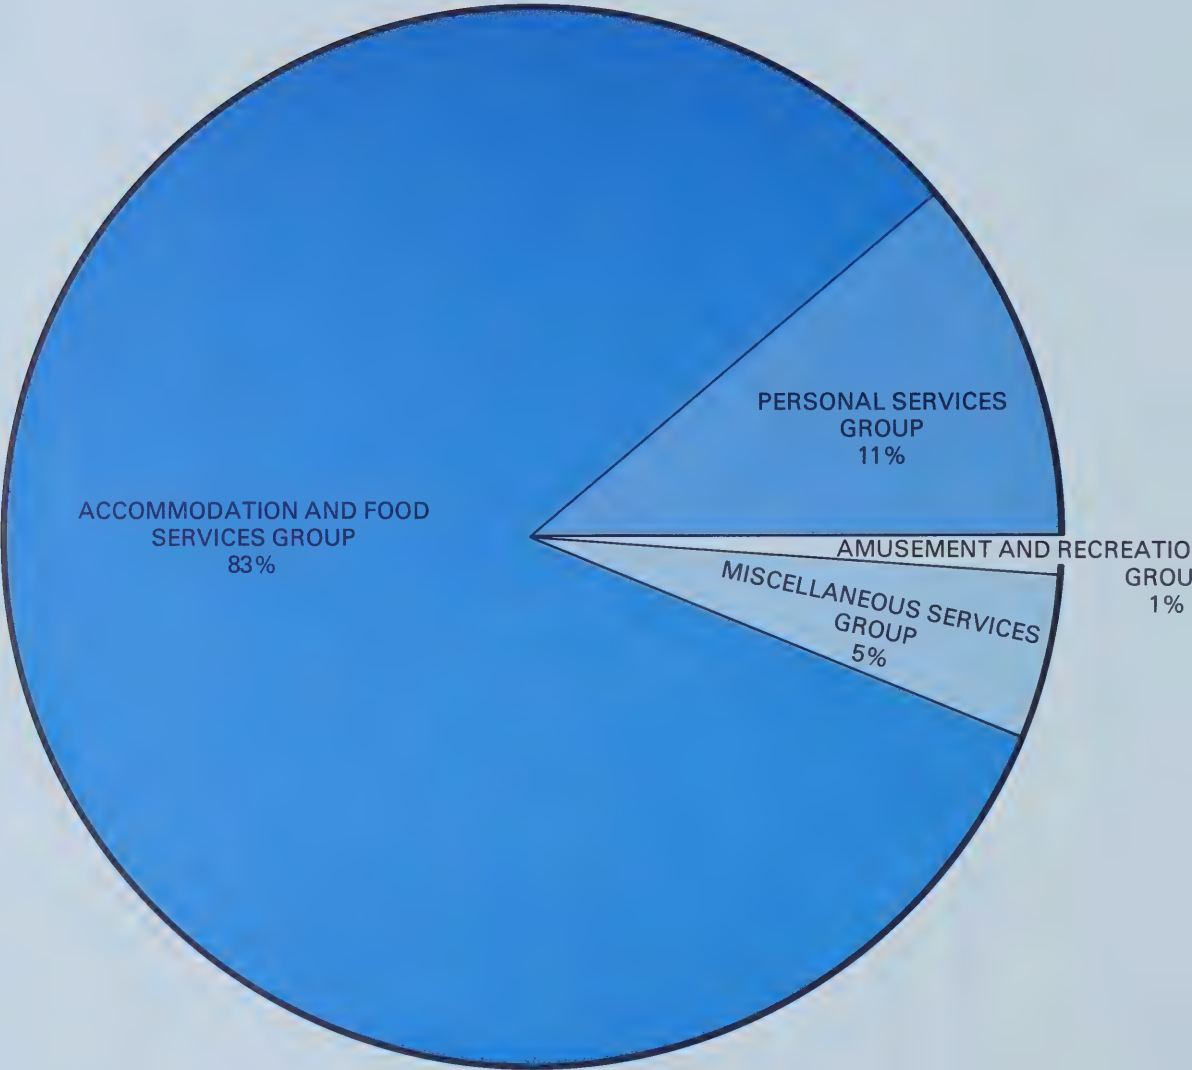

(1) Changes in survey design contributed to non-comparability of 1970 data to other years.

RETAIL TRADE, ALBERTA, 1973
